8. Pharmacologic Approaches to Glycemic Treatment ... A patient-centered approach should be used to guide the choice of pharmacologic agents. Considerations include efficacy, hypoglycemia risk, history of atherosclerotic cardiovascular disease, impact on weight, potential side effects, renal effects, delivery method (oral versus subcutaneous), cost, and patient preferences. Pharmacological approaches to methamphetamine dependence ... The need to find effective treatments for methamphetamine dependence has been identified as a priority by the United States National Institute on Drug Abuse (NIDA) and by European investigators. Various neuronal mechanisms implicated in methamphetamine dependence have suggested several pharmacological approaches. Non-Pharmacological Approaches to Migraine Management ... Issues like conflicting medications, previous adverse reactions and conflicting medical conditions can often prevent people from using prescription migraine medications. When circumstances like these arise, many turn to non-pharmacological approaches to migraine management.

Pharmacological approaches to the challenge of treatment ... In all cases, nonpharmacological approaches, including psychotherapies and neuromodulation (eg, ECT or TMS) should be considered. Figure 1 Steps in the evaluation of treatment-resistant depression (TRD. Pharmacological Approaches to Addiction | Dianova ... The majority of professionals devoted to intervention in the area of drug dependency prioritize the social, cultural and environmental determinants at the beginning and the continuation of the addictive behaviors, while doctors, researchers and others in the scientific community tend to make it clear that they feel that addiction is a cerebral illness that we can cure one day through different pharmacological approaches. Nursing Home Toolkit | Non-Pharmacological Approaches Non-Pharmacological Approaches to Address Behaviors This section of the Toolkit contains a literature review on non-pharmacological approaches (NPA) most effective in reducing the behavioral and psychological symptoms of distress (BPSD) exhibited by persons with dementia residing in nursing homes.
